

LEARN ABOUT PBET FROM THESE VIDEO LESSONS

(NOTE: Some companies ban access to YouTube.

If true in your company, you may have to work on these videos in another location.)

The links below allow you to teach yourself the information from the first 4 lessons in the PBET Workshop.

They were created to use as pre-work for attendees to the Workshop, to allow more time during the 5 day Workshop for other lessons. However, you can also learn a lot by freely using the videos on your own. Using the lessons on your own (without an instructor's supervision) does not "certify" you. To count toward a PBET certificate, an instructor will verify your correct performance on the lesson skills.

Important! "VideoGuides" are provided for the following lessons. You should use them as your basis for learning. They include video instructions and review questions among other things.

So first download the lesson's VideoGuide, then open it. Let it "guide" you through the videos.

Do this on a PC or laptop – not a phone device.

Find a quiet location where you can work without being regularly interrupted.

Set your PDF reader to "view" a single page. Then you should be able to use your keyboard to click through the pages. This may be harder to do if you are viewing it on your browser. If you download the VideoGuides and view them with your PDF reader, you will have more options to size it to your screen... to a single page.

At the end of a video, return to the VideoGuide – the verbal or visual instructions at the end of some videos may say something else; ignore those and return to the VideoGuide.
